

# FLUX BOATING — Trolling Motor Mount Drill Template

PRINT AT 100% — DISABLE FIT-TO-PAGE

PORT (left) install · Page 1 of 2 · fluxboating.com

VERIFY SCALE — the 1" square AND the 6" ruler must measure exactly

⊕ DRILL = drill these into your deck

■ PUCK = 1/4-20 threads already in the plate — do not drill

Pick your drill size based on your fastener: through-bolts need a clearance hole; screws need a pilot hole so the threads bite the deck material.

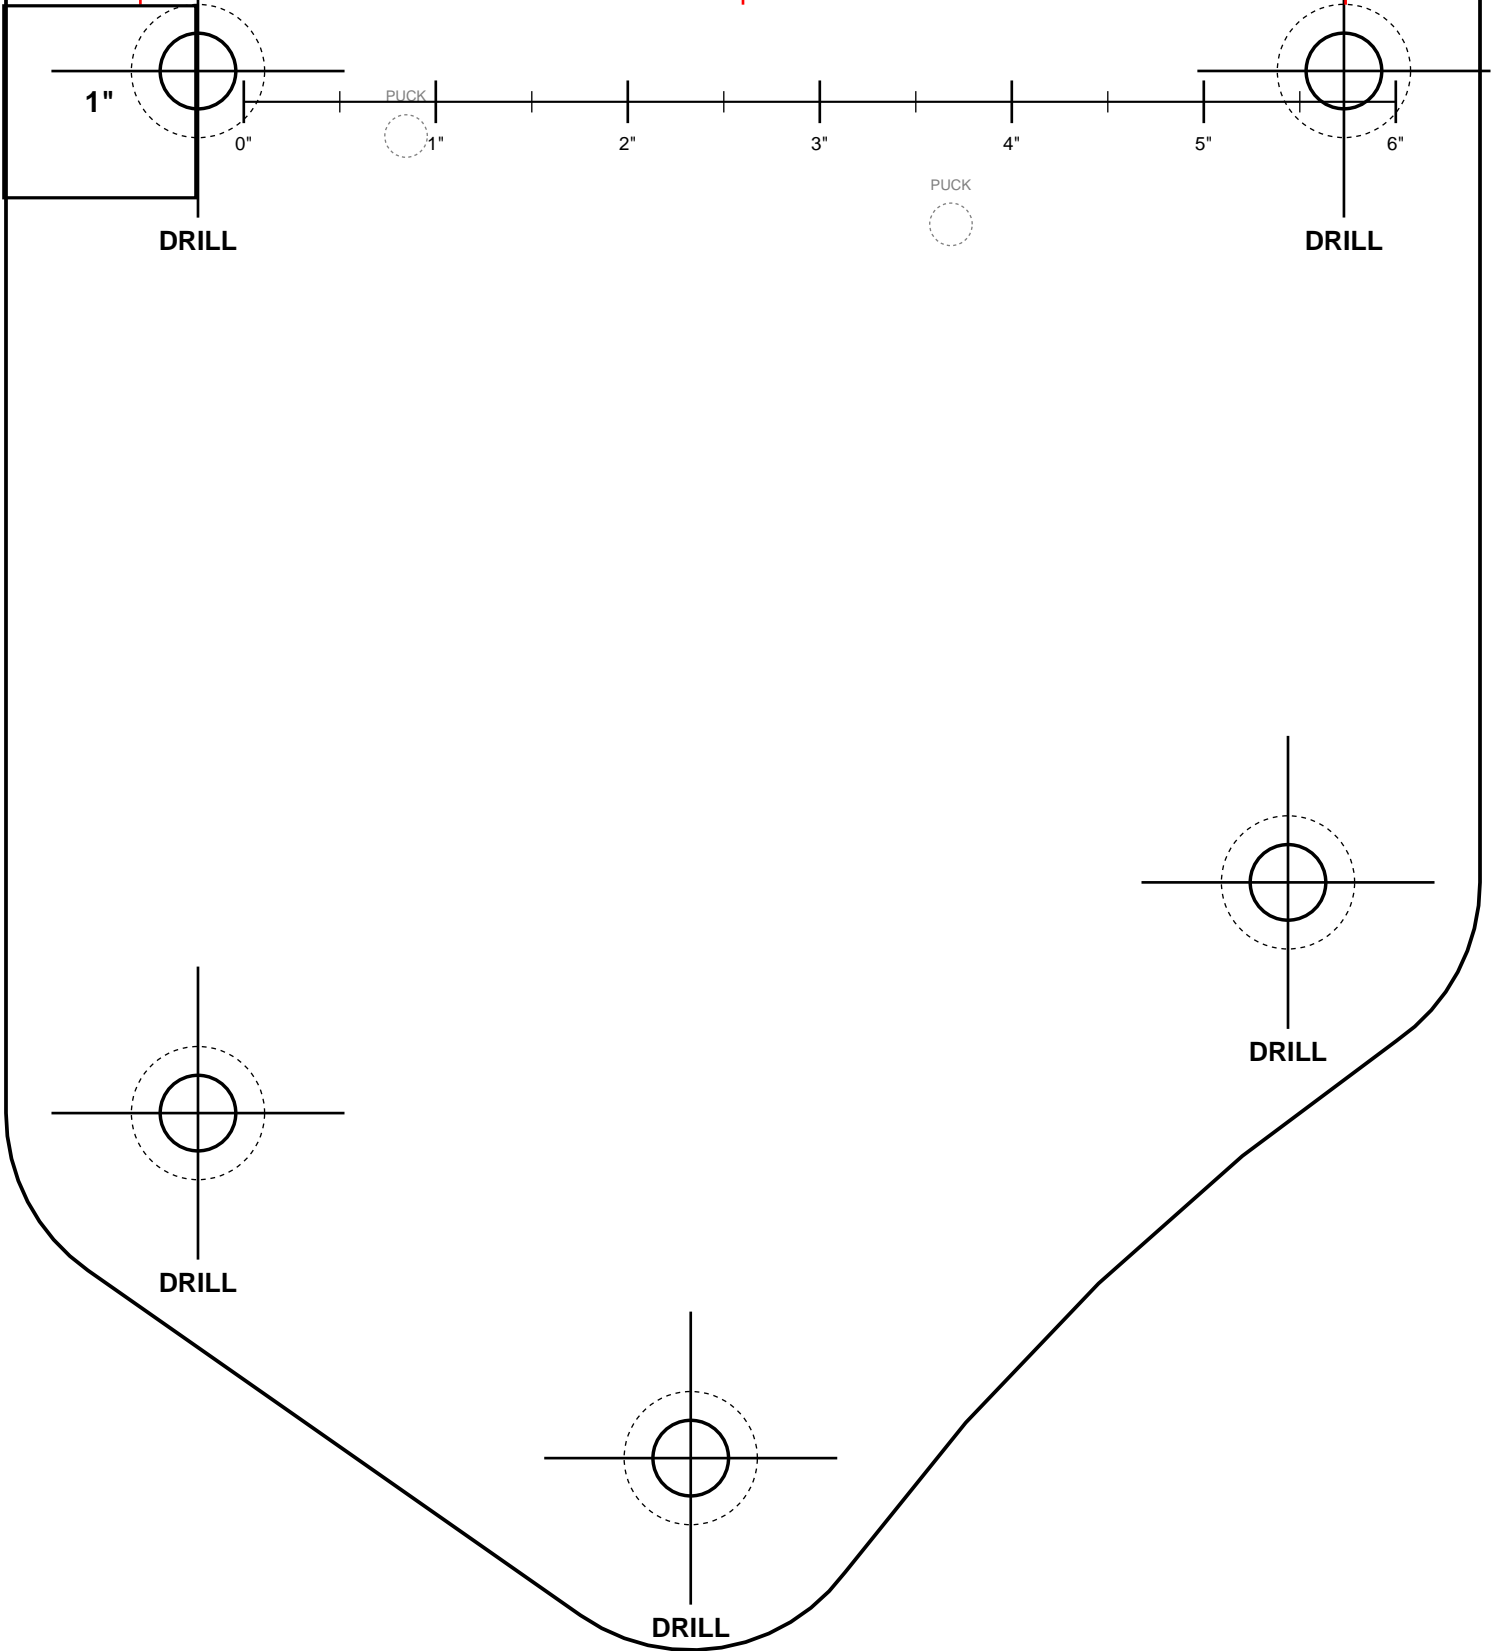

▼ TAPE TO PAGE 2 (below) — align the seam crosshairs
